

PART B

Time: 45 minutes

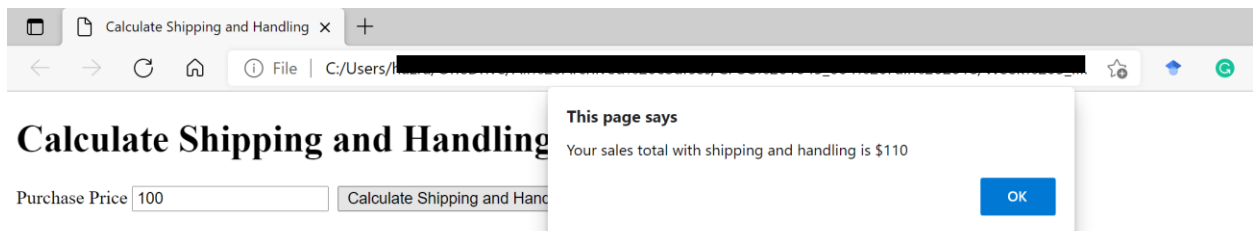

Marks : 20

Create a HTML page as show below:

Calculate Shipping and Handling

Purchase Price

- User will enter the purchase price. The shipping and handling charge will be 10% added to the purchase price.
- When user click on “Calculate Shipping and Handling” button then it should show the total cost in a message box. Below is a sample of the output.

Rubric:

Correct HTML page : 5 marks

Button works correctly (Correct cost + display of message) : 15 marks
